

Relax Within

Ellen's Motion/Sound Picture Gallery, Etc. focuses on relaxation from everyday stress you get on the job, at home and from the environment. Ellen started the home-based/internet-based business this past March. At her present job she discovered a way to help reduce stress by adding nature sounds as a screen saver. Listening to the nature sounds and water helped her deal with the stress and she had the opportunity to view actual pictures that she markets.

She decided this opportunity was what she had been looking for; a way to help people deal with their overwhelming day-to-day stress not only at work but at home. She felt that if people had relaxation tools at their job, they would be better equipped to deal with environmental challenges after leaving the workplace on their way home or wherever they were traveling.

The main focus of Ellen's Motion/Sound Picture Gallery, Etc. is stress reduction; it is not about how much money she can make on a sale! Through her business she wants to help people who are hurting or stressed-out. The products that she markets can make a difference in your life.

Her online gallery includes a variety of moving, lighted waterfall and ocean pictures

that come with the sounds of the ocean, waterfall and nature sounds, a lighted aquarium with moving fish that swim back and forth in the ocean and misting fountains that are the newest invention combining décor and health. These fountains serve an important function because they emit negative ions that cleanse the air of pollutants and humidify your surroundings. They also help eliminate dust, pollen, smoke and pet hair from the air. A bonus is they also function as an aromatic diffuser!

You have the opportunity to shop anytime via the internet and will find lower prices than most of the local competitors. Currently you can place your order by email or phone and Ellen will personally deliver your purchase.
